The Urban Councils Association (UCAZ) recently handed over a road to Chipinge Rural District council which they constructed in assisting towards ease of movement to the Cyclone Idai affected areas. The 19kilometre stretch was constructed following an appeal by the Ministry to the local authorities to intervene given the urgent need to provide an access road at Kopa. After completion of the 19km stretch they also constructed a temporary bridge. Accessibility has now been facilitated because of the construction of the bridge and support and relief services can now reach communities in Chipinge and Kopa area. The Minister of Local Government, Public Works and National Housing Honourable July Moyo applauded the councils for their effort in reaching out at a critical time of need.
